NOTES:

Green Flags

Red Flags

Additional Wanted Information:

Physical:

Roof Area (ft²):

Solar Suitable Roof Area Available (ft²):

Roof Shape / Cover Type

Parking Lot Type / Size

Kitchen Y/N & Size:

Energy:

Electric Utility:

Prior Energy Audit? If so, comments / details / link to report?:

Rate Type (Flat, TOU, Demand):

Winter Avg Electric Demand (kWh/month):

Summer Avg Electric Demand (kWh/month):

Critical Loads Fraction:

Heating Type:

Heating System Capacity:

Heating ducted or ductless?:

Winter Avg Heating Demand (BTU/month):

Winter Avg Heating Cost (\$/month):

Heating System Age:

Heating Comments:

Cooling Type:

Est Avg Summer Cooling Demand (kWh/month):

Est Avg Summer Cooling Cost (\$/month):

Ventilation System? If so, avg demand (kWh/month):

Backup Generator? If so, type/size?:

Existing Solar? If so, capacity? Owned / leased?:

Electrical Service Size (amps):

Building Controls Present? (basic, advanced, none):

Lighting Type:

Envelope Condition / Insulation (describe):

Major Energy Waste Flags (describe):

Islanded Microgrid Siting Considerations (describe):

Wanted Documents:

Electrical single-line diagram and panel schedules

This is one of the most important documents for resilience power planning.

Floor plans

With room names and approximate uses.

You need this to identify the critical room or rooms that could operate as the hub.

Mechanical/HVAC schedules or mechanical plans

Especially equipment types, capacities, zones served, and filter capability.

Roof plan and reroof project documents

Including contractor scope, warranty, roof age, and any structural notes.

Since the reroof occurred in 2025, this is directly relevant to solar readiness and penetrations.

Last 12–24 months of utility bills

Electric and gas, ideally with interval data if available.

This gives you load shape, seasonality, demand charges, and whether backup/solar/storage sizing is even plausible.

Any prior energy audit, ASHRAE study, or building assessment

Any seismic or structural assessment

Emergency operations or continuity plan, if one exists

Fire/life safety inspection reports

ADA access survey or accessibility improvement records

Equipment inventory
